

Fire Safety & Awareness Course

Overview

The Fire Safety & Awareness course is designed to raise awareness of fire hazards within the work environment and to provide participants with the knowledge to be able to deal with these hazards and protect themselves.

Duration: 4 hours

Course Objectives:

On completion of this course participants will:

- Understand the chemistry of fire
- Understand the difference between the various classes of fire and suitable extinguishers available for each class
- Be able to identify potential fire risks within their own workplace
- Have practical experience in the use of portable fire extinguishers on all classes of fire
- Understand the requirement for emergency procedures and the action to be taken in an emergency
- Be capable of conducting emergency evacuation drills within the workplace
